(54) Title: DATA CONVERSION METHODS AND SYSTEMS

(57) Abstract: Methods and systems for implementing high-performance data converters remove analog technology bottlenecks and provide higher converter resolution and higher speed. A preferred embodiment of the method comprises the steps of transforming a time domain input signal into a frequency domain signal in a digital form, processing the frequency domain signal and the input signal using at least two lower-performance data converters in order to obtain at least two processed signals, and recombining the at least two processed signals to obtain a final output signal from the high-performance converter. Inventively and advantageously, the processing includes dividing the frequency domain into at least two frequency domain parts, one related to a low-resolution signal to noise ratio (SNR) and the other elated to a high-resolution SNR, and using frequency information resulting from the division to obtain the at least two processed signals.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.	
PCT/IL04/00757	

Box No. I Basis of this opinion	긕
1. With regard to the language, this opinion has been established on the basis of:	
the international application in the language in which it was filed	1
a translation of the international application into, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).	
With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:	e
a. type of material	
a sequence listing	
table(s) related to the sequence listing	
b. format of material	
on paper	ı
in electronic form	
c. time of filing/furnishing	
contained in the international application as filed.	
filed together with the international application in electronic form.	
furnished subsequently to this Authority for the purposes of search.	
In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has be filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that the application as filed or does not go beyond the application as filed, as appropriate, were furnished.	en in
